

UNIVERSAL FREE-STAND ENCLOSURES

HOFFMAN

Get to your next job...
Faster!

nVent Hoffman Universal Free-Stand enclosures speed design and modification with easy accessory choices for large Unibody enclosures. These standard enclosures ship faster, modify & assemble faster, and increase safety providing you more time.

Universal Free-Stand is designed to protect equipment and employees in industrial manufacturing applications. The one-door and

two-door models are bayed together to create application-specific configurations for indoor and outdoor use. Accessories are available to improve end-user safety and add additional panel space.

Steiner's nVent Hoffman factory-trained specialists can help you select the correct enclosure based on your specifications and requirements.
