

NO MATTER WHAT YOUR NEED,  
HUBBELL WILL ALWAYS BE inREACH™

## INREACH™ INDUSTRIAL AND COMMERCIAL CORD REELS

Hubbell's redesigned **inREACH™** Industrial and Commercial Cord Reels enhance user safety and maximize efficiency by managing cord and power in a safe and organized manner, while also meeting the demands of tough industrial environments.

inREACH™ Industrial and Commercial Cord Reels have a durable, lightweight low profile cast aluminum construction. inREACH™ reels also feature an improved

mounting plate that allows customers to upgrade existing installations or use Hubbell's innovative mounting bracket for a quick, easy installation on any surface.

The Steiner application team can help you select the right inREACH™ Cord Reels and accessories based on your specifications and environment requirements for industrial, commercial, or institutional use.

### inREACH™ Cord Reel Features

- Durable, corrosion resistant cast aluminum construction
- Indoor or outdoor rated reels
- Stainless steel cord reel available for harsh environments
- Black, yellow, or white color options
- Movable guide arm can be mounted in two positions
- Positive latch mechanism automatically maintains desired cord length
- Ratchet lock can be disengaged in field for constant tension applications

### inREACH™ Mounting Brackets

#### Labor Savings are inREACH™!

The inREACH™ mounting bracket allows you to decrease or eliminate the additional labor associated with installing reels at the end of the job. By starting the installation during the earlier stages of the project when there are fewer time constraints, the inREACH™ mounting bracket reduces trim-out to a fraction of the time.

#### Step 1

Secure the inREACH™ mounting bracket during the rough-in process.

#### Step 2

Remove two of the hex bolts from the bracket. Slide the reel into the mounting bracket.

#### Step 3

Replace two hex bolts and secure screws to complete the job.
