ROUGH-IN READY®

Prefabricated Wiring Systems

Prefabricated Solutions for Rough-in Ready® Electrical Installations

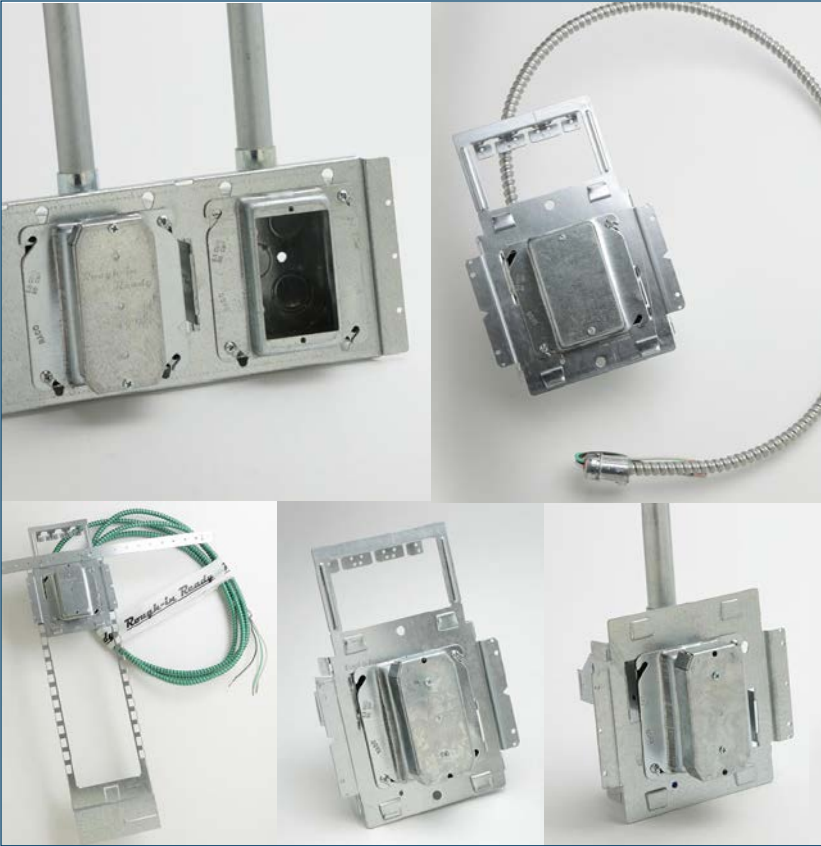

Hubbell Wiring Device-Kellems **Rough-in Ready®** is a pre-engineered and preassembled NEC compliant and UL Listed electrical wiring system with custom-made components for branch circuit installations of virtually any size. Rough-in Ready® can be configured for new construction and retrofitting electrical installations.

Hubbell's Rough-in Ready® system of prefabricated electrical support products is suited for projects

requiring repetitive wiring installation. All prefabricated assemblies and cables are labeled to match a detailed layout drawing. Rough-in Ready® provides the biggest benefit to the installer for projects with many similar rooms.

Steiner application specialists can help you select the correct prefabricated solutions based on your project specs and drawings.

Call **1-800-STEINER** (783-4637) for assistance.
