SystemOne Features

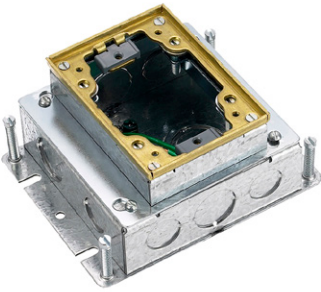

The Hubbell SystemOne Recessed Floor Box line offers a common look regardless of capacity or installation. This simple concept ensures a consistent look throughout a building with rectangular or round covers. Round covers lend themselves to multi-story buildings including schools, hotels, hospitals, retail facilities and office buildings, that are using Fire-Rated Poke-Through devices.

- Wide range of colors and finishes from 2-gang to 10-gang maintain aesthetics throughout facility.
- Choice of rectangular or round covers.
- Ability to match floor box and fire-rated poke-through covers.
- Removable knockouts for 2 in. conduit to meet expanding A/V and data requirements.
- Easy mount device plates and pre-wired receptacle options.
